

ProperTLV Website

Information and Services Checklist

Generated: July 04, 2026

Project: tovi_frontend_realestate (PropertyTLV)

Purpose: Everything the company must provide to replace placeholder/demo content and make the website fully functional with real information.

How to use: Fill in each blank field. CRITICAL items block a real public launch. HIGH items affect credibility and conversions.

Executive Summary

The website UI is largely complete in English and Hebrew. Most business data, media, forms, maps, listings, reviews, and integrations are still placeholder or demo content.

Already real / working today:

- Business name: ProperTLV
- Contact person shown: Tovi
- Phone: 058-6270099 / +972586270099
- WhatsApp floating button
- Bilingual site (English + Hebrew) with RTL support

Still placeholder or missing:

- Email, office address, social media links
- Google Business Profile / Google Reviews link
- Online booking link (Calendly or similar)
- All 10 property listings (demo data)
- Contact form backend (shows success but sends nothing)
- Newsletter signup backend
- Live map (Google Maps or Mapbox)
- Hero animation/video
- Most marketing copy, testimonials, and magazine articles
- Many image assets referenced by the site

1. Business Contact Details

Priority: CRITICAL

1.1 Contact information

Official business email:

Office address (street, building, floor):

City / postal code:

Business hours (EN):

Business hours (HE):

Confirm phone is correct (currently 058-6270099):

Confirm contact person name (currently Tovi):

Used in: Footer, Contact page, WhatsApp button.

Developer files: src/data/placeholders.ts, src/data/business.ts

1.2 Social media accounts

Instagram profile URL:

Facebook page URL:

LinkedIn (optional, not on site yet):

YouTube channel (optional):

2. Google Business and Reviews

Priority: HIGH

Google Business Profile name:

Google Maps place URL:

Google review link (g.page/.../review):

Google Business account owner email:

Company steps:

- Create or claim ProperTLV on business.google.com
- Verify the business
- Add logo, cover photo, address, hours, phone, website URL
- Provide the public review link to the developer

Developer file: PLACEHOLDER_GOOGLE_REVIEWS_URL in src/data/placeholders.ts

3. Online Booking / Scheduling

Priority: HIGH

Preferred booking tool (Calendly / Cal.com / other):

Booking URL for consultations:

Booking label (EN):

Booking label (HE):

Current placeholder: <https://calendly.com/placeholder-property/consultation>

4. Property Listings (Real Inventory)

Priority: CRITICAL

The site currently shows 10 demo listings in `src/data/properties.ts` with fake titles, prices, descriptions, and approximate map coordinates.

How will listings be managed? (Manual / CRM / MLS / Custom API):

CRM or MLS system name (if applicable):

API documentation contact / login:

For each property listing, provide:

- Listing ID / reference number
- Sale or rental
- Property type and neighborhood
- Full street address and exact lat/lng if possible
- Price, size (sqm), rooms, bedrooms, bathrooms
- Features: floor, elevator, parking, balcony, etc.
- English and Hebrew title and description
- Availability status
- 3-8 high-quality photos per listing
- Optional video tour URL

5. Brand Assets and Images

Priority: CRITICAL

5.1 Logos (PNG with real transparency)

- Main header logo (logo_shine_content.png)
- Secondary About-section logo (logo_pat_content.png)
- Favicon / app icon

5.2 Homepage hero

Hero type (photo / video / animation):

Hero file delivery method:

Current state: Hero shows placeholder text "here will be your animation".

5.3 Property and magazine images

Provide photos for each listing and hero images for 4 magazine articles.

6. Third-Party Integrations and API Keys

Priority: CRITICAL for maps, forms, newsletter

6.1 Google Maps (recommended)

Decision: Google Maps or Mapbox?

Google Cloud billing account owner:

Google Maps API key:

Company steps: Create Google Cloud project, enable Maps JavaScript API, create restricted API key, enable billing.

Deploy env vars: VITE_MAP_PROVIDER=google, VITE_GOOGLE_MAPS_API_KEY=<key>

6.2 Mapbox (alternative)

Mapbox account email:

Mapbox access token:

Deploy env vars: VITE_MAP_PROVIDER=mapbox, VITE_MAPBOX_ACCESS_TOKEN=<token>

6.3 Contact form delivery

Preferred method (Email / CRM / Formspree / custom backend):

Destination email address(es):

CRM webhook URL (if applicable):

Current state: ContactForm.tsx shows success but sends no data.

6.4 Newsletter signup

Newsletter provider (Mailchimp / Brevo / other):

API key / list ID / account login:

Current state: newsletterService.ts uses placeholder provider only.

7. Marketing and Written Content

Priority: HIGH

Approve final copy in English and Hebrew for:

- About ProperTLV
- Exclusivity / seller package
- Buyer services
- Seller services
- Magazine intro and 4 articles
- Hero tagline and animation text

Legal company name for footer/contracts:

Tagline (EN):

Tagline (HE):

8. Testimonials and Reviews

Priority: HIGH

Site shows 4 sample testimonials tagged Sample. For each real testimonial provide:

- Client name or Anonymous
- Quote in EN and HE
- Transaction type
- Date (month/year)
- Written permission to publish

Number of real testimonials to publish at launch:

9. Legal, SEO, and Analytics

Priority: MEDIUM

Privacy policy text or link:

Terms of use text or link:

Cookie policy required? (Yes/No):

Production website URL:

Meta description (EN):

Meta description (HE):

Open Graph share image (1200x630):

Google Analytics 4 ID (G-XXXX):

Google Tag Manager ID (optional):

Not yet implemented: Open Graph tags, sitemap.xml, robots.txt, JSON-LD structured data.
